Ideation Phase

Empathy Map Canvas

Student Name: Pranay Patil	**Enrollment No:** EN25EL3010049	**Maximum Marks:** 2 Marks
College / University: Medi-Caps University	**College Email:** en25el3010049@medicaps.ac.in	**Date:** October 2026
Project Title: FORMULA 1 Race Intelligence Dashboard Analysis Report (2010 – 2026)		**Domain:** Data Analytics with Tableau

Empathy Map: Understanding User Needs across Personas

Empathy mapping bridges raw telemetry data with the emotional and operational realities of F1 decision makers.

Dimension	Rajan (Team Strategist)	Divya (Broadcast Analyst)	Arvind (FIA Technical Analyst)
Says	"We need to close the 498-point benchmark gap to Red Bull and predict the exact tyre cliff."	"Give me instant on-screen driver rankings and host nation stats before the grid walk."	"Are our engine freeze rules actually reducing power unit blowouts across regulatory eras?"
Thinks	If we run a 2-stop on high lateral circuits, can our driver gain back the 22.4s pit loss?	Viewers love head-to-head graphics and podium shares of the top drivers.	Engine manufacturers must adhere to reliability quotas to keep racing sustainable.
Does	Simulates tyre pace deltas, benchmarks competitor trajectories, scouts global driver talent.	Prepares live TV packages, filters cumulative points, generates podium breakdown infographics.	Audits mechanical DNFs, measures grid finish rates, compiles compliance reports.
Feels (Pains)	Frustrated by disparate data, fear of falling victim to undercuts or selecting high-deg tyres.	Time-crunched during live television broadcasts, risks on-air misinformation.	Overwhelmed by unstructured accident reports, pressured to validate safety rules.
Gains	Clear predictive pit-windows, confident driver recruitment, championship points gains.	Accurate live broadcast visuals, high viewer engagement, authoritative editorial pieces.	Data-backed regulatory enforcement, 48% validated DNF reduction, improved track safety.
